APPLICATION SCENARIOS

Trichloroisocyanuric acid is a kind of **chloroisocyanuric acid** compounds, and it is an important **bleach**, chlorinator and **disinfectant**. Compared with traditional Chlorinators (such as liquid chlorine, bleach powder and bleach powder), it has the characteristics of high effective chlorine content, stable storage and transportation, convenient forming and using, high sterilization and bleaching power, long time of effective chlorine release in water, safety and non-toxic, etc. Therefore, its development and research have been paid attention by various countries.

Q: How long is your delivery time?

A: It generally takes 5-10 days if the goods are in stock, or 15-20 days if the goods are not, depending on the quantity ordered.

Q: Do you provide samples? Does it cost extra to request one?

A: Yes, we could offer the sample for free by requests but are not responsible for the freight cost.

Q: What is your terms of the payment ?

A: If the payment is ≤ 1000 USD, please pay 100% in advance. If the payment is ≥ 1000 USD, please pay 30% T/T in advance, balance before shipment.

If you have any other questions, please feel free to contact us.

Q: Can you support OEM /ODM?

A: Yes, we can make products as your request.

Q:How can I get some samples?

A: Please send us your address, we'll be happy to offer you samples.

Q:Do you have stock?

A: We understand that most customers prefer products in stock, so we'll try to keep most products in stock. However, we can keep certain products in stock because they need time to be synthesized.

Q:What documents you provide?

A:Usually, we provide Commerical Invoice, Packing List, Bill ofloading,Insurance,COA , and Origin certificate.

If your markets have any special requirements, let us know.

Q:How do you treat quality complaint?

A:First of all, our quality control will reduce the quality problem to nearly zero. If there is a real quality problem caused by

us, we will send you free goods for replacement or refund your loss.
